Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Art Unit: 1654

1. Claims 1-12 are pending in this application.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,6,8 and 9 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Yonehara et al (JP 9-324732, Nov. 26, 1997).

Yonehara et al disclose a method for measuring the amount of glycosylated proteins comprising the steps of decomposing glycosylated proteins in a sample with protease, causing a redox reaction between the decomposed products and an Amadori compound oxidoreductase, and determining the redox reaction so as to measure the amount of glycosylated proteins. Yonehara et al also disclose that the amount of hydrogen peroxide produced by the redox reaction or amount of oxygen consumed by the redox reaction is measured, and thereby the amount of glycosylated proteins can be determined. In addition, Yonehara et al disclose the method for measuring the amount of hydrogen peroxide or the amount of oxygen is not particularly limited, and any

Art Unit: 1654

conventionally known method may be employed. With respect to the components in the kit described in instant claim 9, Yonehara et al disclose using a protease, oxidase and reagent for assaying hydrogen peroxide in the methods. See the entire document. Thus, Yonehara et al disclose the invention claimed except for using the word "kit".

However, regarding the kit as described in the instant claims, Yonehara et al disclose each component in the kit claimed for performing the same function set forth in the present invention. Therefore, Yonehara et al disclose all the limitations of the instant claims except for using the word "kit" but describes each component and the properties or functions claimed in the present invention which anticipates or renders obvious the claimed invention.

The burden of proof is on applicants to show patentably distinct differences between the Yonehara et al methods and reactants and the present invention as claimed.

3. Claims 2-5, 7 and 10-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The Yonehara et al reference (US 5,985,591) has been cited to further show the state of this art.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Louise N. Leary whose telephone number is (703) 308-3533. The examiner can normally be reached on Monday to Friday from 9:30 to 6pm.
